CS-MS SERIES Recommended Torque

Please be advised of the following changes to the recommended torque values for the CS-MS dry-mate connector range.

Current Recommendation

Bulkhead Mounting Torque	20 inch lbs* (J size) 25 inch lbs* (K size)

New Recommendation

Bulkhead Mounting Torque	100 inch lbs* (J & K size) for installation into metallic housings 20 inch lbs* (J size) for installation into non-metallic housings 25 inch lbs* (K size) for installation into non-metallic housings

Torque values refers to installation into dry metal threads.

The current literature will be updated with this new information shortly.
