Advantages of Hiring a SEACON Technician

- SEACON always provides exemplary service for maintenance, and refurbishment of OEM & other equipment.
- We offer competitive day-rates for short and long-term service needs.
- Technicians are fully certified in Soldering, Electrical and Fiber Optic servicing.
- Staff on call 24/7/365 for immediate deployment and technical troubleshooting.
- Capacity and bandwidth for any job.

OHSAS 18001-2007, ISO 14001-2004, and ISO 9001-2008 Certified

Frequently Asked Questions

Q: Can you deploy technicians ASAP?

A: Yes, we have the ability to deploy technicians within 4 hours from receipt of call for service.

Q: Is there someone I can call for general questions, troubleshooting or advice?

A: Yes, we have a full line of hands-on professionals who can walk you through any question or maintenance assistance need.

Add Value to Your Business

SEACON technician flexibility allows our customers to reduce costly overhead by keeping only core staff and hiring SEACON technicians for overflow work only when needed. SEACON is always professional and safe, taking pride in the work we do.

“No matter what time I have called you, you have always immediately done what is possible to get us an answer or advice – no matter what time it is in the US! We definitely appreciate your efforts....”

-Electrical Supervisor, Drilling Company
